

# Innovation Meets Convenience

**ingenico**  
GROUP

Meet the newest way to take payments with TETRA's advanced line of smart terminals.

Satisfy the most demanding expectations. TETRA devices support any payment method, enhance consumer interactions with rich multi-media options and meet the latest security demands.

**Highest Security.** PCI-PTS 4.x certified and satisfies the latest hardware and software security requirements. Telium TETRA OS uses the latest cryptographic schemes.

**User-friendly and intuitive interface.** Powerful multimedia capabilities and a large 3.5" touchscreen, TETRA enables HTML5 web-based rich media business apps.

**All Payment Options.** Supports all forms of electronic payments including EMV chip & PIN, magnetic stripe, signature capture, and NFC/contactless.

**NFC payment.** Seamlessly enables contactless payments by providing a dedicated customer-facing NFC card reader zone for faster transaction flows.

# Create new customer experiences

## The Desk/5000

Meets the most demanding use cases, turning the point-of-sale into a point-of-service for the countertop. As an option, include the iPP315 as a secondary PIN pad.
